SUBJECT INDEX

Abnormal pregnancy-anencephalus
  quantitative evaluation of human placental aromatase in, 219
Adipose stromal cells
  gene regulation studies of aromatase expression in, 273
  transcriptional regulation of CYP19 gene (aromatase) expression in, in primary culture, 203
Adrenal glomerulosa cells
  role of nitric oxide in the regulation of aldosterone synthesis by, 47
Aldosterone
  role of nitric oxide in the regulation of, synthesis by adrenal glomerulosa cells, 47
Androgen(s)
  -dependent mouse seminal vesicle secretory protein of 99 amino acids (MSVSP99): regulation of the mRNA and preliminary characterization of the promoter, 87
  receptor(s)
    differential regulation of aromatase and, in granulosa cells, 233
    wide variation in, dysfunction in complete androgen insensitivity syndrome, 19
Androgen insensitivity syndrome
  wide variation in androgen receptor dysfunction in complete, 19
Aromatase
  aberrant expression of, in breast cancer tissues, 175
  cooperative regulation of the human, cytochrome P450 gene transcription by placenta-specific *cis*-acting elements, 211
  definition of the elements required for the activity of the rat, promoter in steroidogenic cell lines, 341
  differential regulation of, and androgen receptor in granulosa cells, 233
  diverse function of, and the N-terminal sequence deleted form, 117
  endocrine disorders associated with inappropriately high, expression, 133
  estrogen production via the, enzyme in breast carcinoma, 267
  evolutionary and functional significance of two CYP19, genes differentially expressed in brain and ovary of goldfish, 387
  expression of, and its localization in human breast cancer, 293
  expression of cytochrome P450, in the channel catfish *Ictalurus punctatus*, 393
  expression of, during development of mouse brain is modulated by neurotransmitters, 299
  functional interactions of CREB and SF-1 mediate hormone regulated expression of the aromatase gene in granulosa cells and constitutive expression in R2C cells, 223
  gene regulation studies of, expression in breast cancer and adipose stromal cells, 273
  impact of, mechanisms on other P450s, 127
  in axonal processes of early postnatal hypothalamic and limbic areas including the cingulate cortex, 349
  in breast tumours: role of the immune system, 185
  inhibition
    binding characteristics of, and phytoestrogens to human aromatase, 107
    biochemistry and pharmacology of 7α-substituted androstenediones in, 247
    clinical use of, in the treatment of advanced breast cancer, 241
    future uses for, in breast cancer, 261
    in JAr choriocarcinoma cells by 7α-arylaliphatic androgens, 73
    plasma estrogen suppression with, evaluated by a novel and sensitive assay for estrone sulphate, 255
    potent and selective, by ARIMIDEX in the treatment of advanced breast cancer, 145
  in the normal breast and breast cancer, 281
  molecular aspects of brain, cytochrome P450, 375
  mRNA, neuroanatomical distribution in the rat brain, 307
  porcine, studies on tissue-specific, functionally distinct isozymes from a single gene, 407
  product of, activity in intact LNCaP and MCF7 human cancer cells, 287
  quantitative evaluation of human placental, in abnormal pregnancy-anencephalus and hydatidiform mole, 219
  regulation of, activity within the breast, 193

regulation of, expression in the ovary and placenta, 399
sex differences and androgen-dependent regulation of, (CYP19) mRNA expression in the developing and adult rat brain, 359
sex differences in the androgen-regulated expression of cytochrome P450, in the rat brain, 365
sex differences in the regulation of, in the embryonic brain, 315
steroid control and sexual differentiation of, in the brain, 323
structure of, mRNA in the rat brain, 381
temperature-dependent, expression in developing diamondback terrapin (*Malaclemys terrapin*) embryos, 415
transcriptional regulation of CYP19 gene, expression in adipose stomal cells in primary culture, 203

Bone
role of estrogen in, growth and maturation during childhood and adolescence, 141
Brain
autonomous expression of aromatase during development of mouse, is modulated by neurotransmitters, 299
evolutionary and functional significance of two CYP19 genes differentially expressed in, of goldfish, 387
molecular aspects of, aromatase cytochrome P450, 375
neuroanatomical distribution of aromatase mRNA in the, of rat, 307
sex differences and androgen-dependent regulation of aromatase (CYP19) mRNA expression in the developing and adult, of rat, 359
sex differences in androgen-regulated expression of cytochrome P450 aromatase in the, of rat, 365
sex differences in the regulation of embryonic, aromatase, 315
steroid control and sexual differentiation of, aromatase, 323
structure of aromatase mRNA in the, of rat, 381
Breast
regulation of aromatase activity within the, 193
Breast cancer
aberrant expression of aromatase in, tissues, 175
a potent and selective aromatase inhibitor: ARIMIDEX for the treatment of advanced, 145
aromatase expression and its localization in human, 293
aromatase in the normal breast and in, 281
clinical use of aromatase inhibitors in the treatment of advanced, 241
control of aromatase activity in, and role of the immune system, 185
estrogen production via the aromatase enzyme in, 267
exemestane experience in, treatment, 151
future uses for aromatase inhibitors in, 261
gene regulation studies of aromatase expression in, 273

Choriocarcinoma cells
aromatase inhibition in JAr, by 7α-arylaliphatic androgens, 73
Cytochrome P450
aromatase, gene transcription by placenta, 211
molecular aspects of brain aromatase, 375
sex differences in androgen-regulated expression of, aromatase in the rat brain, 365

Estradiol
local metabolism of, in osteoblast- and osteoclast-like cells, 167
Estrogen(s)
effect of, deprivation on the reproduction physiology of male and female primates, 157
receptor(s)
estradiol and tamoxifen decrease proliferation and invasiveness of cancer cells transfected with a mutated, 11
neurotransmitters activate the human, in a neuroblastoma cell line, 1
up-regulation of the, by triiodothyronine in rat pituitary cell lines, 79
role of, in bone growth and maturation during childhood and adolescence, 141
Exemestane
experience in breast cancer treatment, 151

Gene(s)
evolutionary and functional significance of two CYP19, differentially expressed in brain and ovary of goldfish, 387
porcine aromatases: studies on tissue-specific functionally distinct isozymes from a single, 407

Gene expression
of aromatase in breast cancer and adipose stromal cells, 273
of aromatase in granulosa cells, 223
transcriptional regulation of CYP19, in adipose stromal cells in primary culture, 203
Glucocorticoid(s)
/oxysterol-induced DNA lysis in human leukemic cells, 35
receptor(s)
regulation of, by the tyrosine kinase inhibitor herbimycin A in the cytosolic fraction of primary cultured rat hepatocytes, 65
Granulosa cells
differential regulation of aromatase and androgen receptor in, 233
evidence that functional interactions of CREB and SF-1 mediate hormone regulated expression of the aromatase gene in, 223

Hydatidiform mole
quantitative evaluation of human placental aromatase in, 219
17β-Hydroxysteroid dehydrogenase
activity of, in Ishikawa human endometrial adenocarcinoma cells, 27

Immune system
control of aromatase activity in breast tumours: role of the, 185
Ishikawa human endometrial adenocarcinoma cells
steroid sulfotransferase and 17β-hydroxysteroid dehydrogenase activities in, 27

Leukemic cells
glucocorticoid/oxysterol-induced DNA lysis in human, 35
LNCaP cells
product of aromatase activity in intact, 287

MCF-7 mammary cancer cells
product of aromatase activity in intact, 287

Neurotransmitters
activate the human estrogen receptor in a neuroblastoma cell line, 1
autonomous expression of aromatase during development of mouse brain is modulated by, 299
Nitric oxide
role of, in the regulation of aldosterone synthesis by adrenal glomerulosa cells, 47

Osteoblast
local estradiol metabolism in, and osteoclast-like cells, 167

P450s
the impact of aromatase mechanism on other, 127
Phytoestrogens
binding characteristics of, to human aromatase, 107
Placenta
cooperative regulation of the human aromatase cytochrome P450 gene transcription by, -specific *cis*-acting elements, 211
quantitative evaluation of human, aromatase in abnormal pregnancy-anencephalus and hydatidiform mole, 219
regulation of aromatase expression in, 399

Raloxifene
evaluation of the major metabolites of, as modulators of tissue selectivity, 97
Receptor(s)
androgen(s)
differential regulation of aromatase and, in granulosa cells, 233
wide variation in, dysfunction in complete androgen insensitivity syndrome, 19
estrogen(s)
estradiol and tamoxifen decrease proliferation and invasiveness of cancer cells transfected with a mutated, 11

neurotransmitters activate the human, in a neuroblastoma cell line, 1
up-regulation of the, by triiodothyronine in rat pituitary cell lines, 79
glucocorticoid(s)
regulation of, by the tyrosine kinase inhibitor herbimycin A in the cytosolic fraction of primary cultured rat hepatocytes, 65
5α-Reductase(s)
inhibition of rat, by finasteride: evidence for isozyme differences in the mechanism of inhibition, 55
mRNA
neuroanatomical distribution of aromatase, in the rat brain, 307
structure of aromatase, in the rat brain, 381

Steroidogenesis
definition of the elements required for the activity of the rat aromatase promoter of, in cell lines, 341
Sulfotransferase
steroid, activity in Ishikawa human endometrial adenocarcinoma cells, 27

We would like to express our deep thanks to the following persons for their kind collaboration in reviewing papers for this volume of *The Journal of Steroid Biochemistry & Molecular Biology:*

Bartnor C. D., North Carolina, U.S.A.; **Bofetiado D.,** North Carolina, U.S.A.; **Luu-The V.,** Quebec, Canada; **Merand Y.,** Quebec, Canada; **Rowlands M. G.,** London, England, U.K.
